

Quality & Service made in Italy
since 1981

Company Profile

We shape your
needs

Italian mechanical
engineering excellence
since 1981

Our Mission

A partner always by your side

Efficient organisation, continuous skill development and technological innovation: these are the drivers driving Mancin S.r.l.'s strategy, whose main objective is to support its customers as a true technological partner, able to adapt quickly to market needs by offering not just a product but specific solutions.

Our Values

INNOVATION & TRADITION

- Over 40 years of experience, technical improvements, and research for innovation to ensure the highest quality standards.

PARTNERSHIP

- Attention to our customer's needs, will of working in direct contact with them and experience in different sectors make us an ideal partner and a reference point in competence and reliability.

SERVITIZATION

- We make products but we deliver services.

The company in numbers

Foundation Year: 1981

Turnover (€): 2 ML

Employees: 15

Working Shifts: 2

Building surface: 3000 m²

For over 40 years, Mancin S.r.l. has been working in the field of precision machining for third parties.

Attention to quality and detail combined with the efficiency of our production system have always been the key to steady growth and lasting success for us.

Main mechanical processes

CNC MILLING

Max dimensions: 1520x700xH610

CNC TURNING

Dimensions

Bar working diameter: Ø12 to Ø80

Max. Turning diameter : Ø420

NC AUTOMATIC FLAT GRINDING

Max. dimensions: 1300x650xH500

ASSEMBLY

3D Metrology Lab Unit

The heart of our business
is the production of
custom-designed
precision complex parts
in small and medium
series.

Production is organized in different departments: a comprehensive range of multi-axis CNC milling and turning machinery including an horizontal spindle grinder and an engineering department.

We also provide in a dedicated structure a functional unit assembly service with the integration of third-party components, as well as a 3D Metrology Lab Unit to ensure quality and specifications standards for different sectors and industries.

Skills & Capabilities

Large production capacity
at **your service**

Mancin Srl's machinery is capable of processing most of the materials used in the manufacture of industrial components. In addition to constant investments in plant maintenance and renewal, the desire to better control and manage production processes has led the company to integrate all machining operations by directly managing all phases of the supply chain.

Our business model

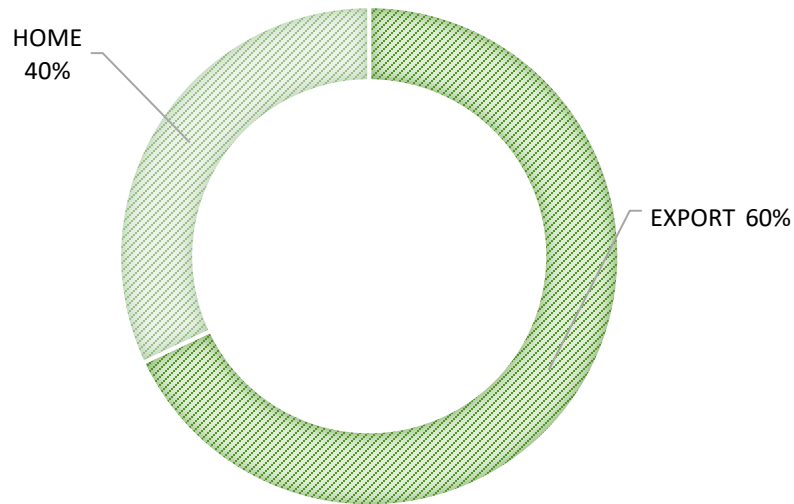

We add **value** to your products

With a view to increasing servitisation, we provide our customers with a range of complementary services, such as: prototyping, heat and surface treatments, marking, welding, storage of semi-finished and/or finished products, dedicated packaging and logistics.

Through our technical department we can also offer an engineering consultancy service.

Main Markets & Sectors

Our target sectors:

- Food & bottling industry
 - Textile sector
 - Security systems
 - Aviation
- Robotics & Medical sector
 - Automotive
 - Packaging
 - Railway

Our target countries:

France, Germany,
Bulgaria, Norway, Finland,
Switzerland

Spoken Languages:

English, French, German

Our Quality System

Product quality stems from the **quality** of the processes and the competence of the people who carry them out

Mancin S.r.l. constantly invests in its products and production processes with a view to continuous improvement in order to guarantee its customers maximum product and service reliability. For this we have:

- an air-conditioned **metrology room** equipped with modern measuring and control instruments that guarantee millesimal precision of manufactured components;
- modern 5-axis **CAD/CAM** programming systems for milling and turning to better manage both the design and production phases;
- **management software** for real-time production control.

Our Strong Points

Flexibility in Volumes

- We also produce samples, prototypes and spare parts.

Flexibility in Lead Time

- Prototypes in 15 days and batches in 4 weeks.

Servitization

- We add value to your products with our services

Supply Chain Management

- Vertical integration and control of performance and quality standards throughout the supply chain

Spoken Languages

- English, French, German

'Blessed are the flexible because they will never lose their shape'

Our Quality Certification

Our company has been
ISO 9001 certified since
2008
